Nine German artists

with one common experience:

They all have been residents in the International Studio & Curatorial Programm, ISCP, in Brooklyn/New York.

This alumni exhibition shows the long-term effects of these residencies on the artistic work and how fruitful an exchange in the field of art is.

For the exhibition, all artists have selected works that could not have been created without the influences of their fellowships in New York. The exhibition X=change not only invites visitors to discover the developments of individual artists, but also to discuss the significance of cultural exchange on the basis of these examples.
